

COTTONGEN

COTTON DATABASE RESOURCES

Welcome to the monthly CottonGen Mailing List email which is used to send updates about what is new on CottonGen and how to use CottonGen

Here is an overview of CottonGen in 2023 and we would like to thank the cotton research community for your support!

Wishing you the happiest holidays
From the CottonGen

More Data. We added more data in 2023 including 18 new [whole genome assembly](#), [QTL](#), [markers](#), [genetic map](#), [genotype](#), and [phenotype](#) data. We also started adding GWAS data and added more expression data! Check the '[Data Overview](#)' page for currently available data.

New and Updated Tools. [MegaSearch](#) and [MapViewer](#) are updated to display GWAS data, and the [Expression Heatmap](#) allows researchers to quickly and easily identify patterns of gene expression that are associated with specific conditions or treatments.

New Short Video Tutorials. This year we made six new video tutorials

[How to search cotton markers using MegaSearch](#)

[How to view genomes linked to genetic maps](#)

[How to use MegaSearch for Gene and Transcripts](#)

[How to search traits and see all the linked data](#)

[How to use the Expression Heatmap Tool](#)

[How to view correspondences between genomes and genetic maps](#)

NewsLetters. We sent out four quarterly [NewsLetters](#)

Join us at 2024 January Conferences:

the Beltwide Cotton Conference - Cotton Improvement Conference:

Thur. Jan. 4 at 4 PM: Oral presentation

[Using CottonGen for Cotton Improvement](#)

PAG - Tripal Database Network and Initiatives

Sat, Jan. 13 at 5:14-5:32 PM

[TripalMap Mapviewer 2.1](#)

PAG - National Research Support Project (NRSP10)

Sun, Jan. 14 at 1:30-3:40 PM

[Database Resources for Crop Genomics, Genetics and Breeding](#)

PAG - Digital Tools and Resources

Tue, Jan. 16 at 12-12:30 PM

[CottonGen 2023: New Data and New Functionality to Enable Cotton Research](#)
