

CottonGen is a database built and maintained for the cotton community!

Genetic Data and Tools:

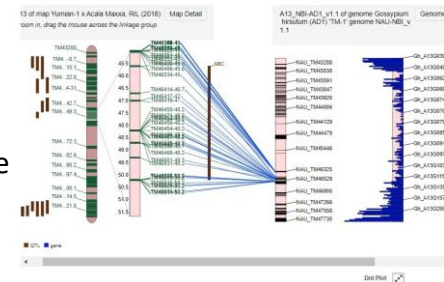

- 117 genetic maps
- 690,386 genetic markers
- 7,436 QTL and MTL
- MapViewer to view and compare maps and export figures
- MegaSearch to query and download data

Genetic Data and Tools:

- 117 genetic maps
- 690,386 genetic markers
- 7,436 QTL and MTL
- MapViewer to view and compare maps and export figures
- MegaSearch to query and download data

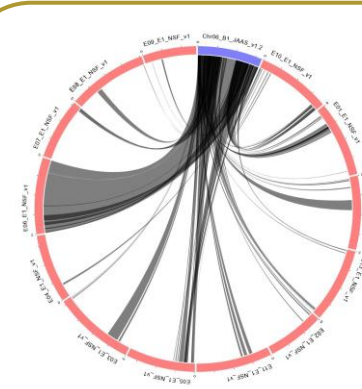

Genomic Data and Tools:

- 55 genomes of 13 species
- Synteny Viewer
- Ortholog/Paralog Search
- JBrowse
- BLAST
- PathwayCyc
- MegaSearch for query of gene and transcript functional annotation data
